

Regulatory Services

Comprehensive support for new product introductions, data development and global compliance of existing products

Intertek Expert Services provides a comprehensive regulatory resource for customers to develop and implement worldwide regulatory strategies. It is independent from laboratory testing houses and includes services related to new product introductions, data development as well as compliance of existing products with local and global regulations.

The services are based on our extensive global regulatory knowledge and decades of practical experience dealing with chemicals regulation. The organization has offices located around the world and has established a strong, direct network with local as well as regional trade associations and government authorities.

- Notification of new chemicals
- Registration of biocides, indirect food contact
- Global chemicals management
- Design and optimization of tox and ecotox tests
- Global legislation development and training

Intertek Expert Services helps customers in highly regulated industries achieve local, regional and international compliance

The service offering of Intertek Expert Services covers chemicals, formulations, polymers and end use articles to be commercialized in domestic and international markets. Clients benefit by enjoying lower costs through outsourcing, and extended global reach, convenient one-stop shopping and reduced time to market.

Notification/registration of new chemicals

- Strategic consulting, Pre-Registration, Registration, Consortia management and SIEF/Consortia representation, legal representation in EU ('Only Representative'), dealing with authorization (PBT, CMR).
- Including integrated test strategies/non-testing, identification of analogues/read across/grouping, data evaluation (Klimisch criteria), collecting relevant data from public domain, chemicals safety report preparation, classification and labeling risk and exposure assessment/scenarios

Global chemicals management

Support in commercializing products in different regions of the world in compliance with the local chemical legislations.

- Hazard classification and communication
- Chemical inventories and product registers
- Control regimes (CWC, drug precursors, dual uses, import/export)
- Product safety and risk assessment

Tox & ecotox testing

Our expertise in collaboration with selected partners delivers experimental services and regulatory management.

- Notification of chemical substances
- Registration under REACH or assessment in HPV programs
- Profiles for hazard classification of chemicals
- Protocol, data and reports to meet international regulatory standards

Application registration worldwide

Guidance in the key steps to achieving compliance of end-use articles for commercialization into the market.

- Indirect food contact applications
- Indirect contact with drinking/potable water (NSF Scheme)
- Registration of medical devices and biocides

Global legislation development and training

In addition to our seminar and workshop program, we provide information and advice services tailored to your needs covering legislation around the world. Special training sessions, in-house or at the customer's sites, are organised involving internal experts as well as external worldwide recognized specialists.
